

FOOD GRADE STATEMENT

Extir

With our mentioned expandable polystyrene (EPS) grades, as supplied in original packaging, it is possible to produce expanded finished items intended to come into contact with foodstuffs, complying with the prescriptions set by the regulations currently in force in the following Countries:

- **Italy:** Decreto Ministeriale 21/03/73 "Disciplina igienica degli imballaggi, recipienti, utensili destinati a venire a contatto con le sostanze alimentari e le sostanze d'uso personale" and following amendments.
- **Germany:** Bedarfsgegenständeverordnung von 13/07/2005 and following amendments.
- **France:** Applicable regulations published in Brochure n°1227.
- **EU:** Directive 2002/72/EC "Plastic materials intended to come into contact with food" and following amendments (2004/1/EC, 2004/19/EC, 2005/79/EC, 2007/19/EC; 2008/39/EC).

The mentioned products do not contain monomers or additives with a restriction (specific migration limit - SML) in the EU directives.

The products do not contain substances authorized as flavourings, nor as direct food additives with restrictions in the applicable EC directives.

We point out that it is a responsibility of the end users to ensure that materials and articles, manufactured with good manufacturing practice (Commission Regulation (EC) 2023/2006), under their normal or foreseeable conditions of use, do not transfer their constituents to foodstuffs in quantities which could endanger human health and/or bring unacceptable changes in the composition of the foodstuffs or a deterioration in the organoleptic properties (Regulation (EC) No 1935/2004).
